

For Immediate Release.....

Operator Qualification Courses Automatically Updated by OQ Partners

Houston, TX – March 7, 2003 –OQ Partners has completed the review and revision of all training modules within the eWebOQ library to ensure coverage of the DOT Subpart H revisions. During the months of January and February, our developers worked with our subject matter experts to review every title in the eWebOQ library in light of the revised corrosion control regulation. The eWebOQ library includes courses for gas pipeline and liquids pipeline operators.

The entire library of courses was evaluated. Courses that had training or testing affected by the changes to the regulations were updated and are available to all subscribers of the eWebOQ system. Additionally, the Performance Checklists that are made available through the eWebOQ system were also evaluated for coverage of Subpart H. Additionally, one brand new training module covering the changes included in Subpart H was created for those learners that have already completed initial qualification.

Armando Caceres, President of OverNite Software says, “The automatic evaluation and update of the eWebOQ library demonstrates our commitment to delivering a solution that is constantly synchronized with the regulations and provides real value to the eWebOQ customers.”

Important Notice: Addressing the DOT rule requires more than just training; it also requires performance evaluations, records, reports, and management of workers' curricula. Unless you have a way to automatically grade tests, records, reports, and easily manage user curriculum, managing this work load becomes time consuming fast and overhead sky rockets. That's where eWebOQ by OQ Partners can help. Just look at these benefits:

- Automatic Record Keeping – no on-going paper-intensive administrative work to do
- Automatic Reports – generated on the fly, for both workers and supervisors
- Built in Course Editing Tools – you can even create courses of your own
- Built in Test Creation Tools – build tests for any course, even PowerPoint & others
- Built in Test Out Feature – only take a course on the questions you missed

- Assign full or partial administrative rights to individuals – you decide
- No hardware to buy – through remote hosting, it's included, or host your own
- Link to PeopleSoft, SAP, or other HR systems – optional, it's up to you
- 62 courses included – these courses address the DOT mandate, why wait
- 100% web ready – you just need a browser to get started

Visit OQ Partners at www.eWebOQ.com for an impressive test drive!
